

ABSTRACT

The object of the present invention is to provide an efficient and safe investment system in purchasing precious metals at a fixed-monetary-amount on a continuous basis. This system allows to quickly execute the process for sales, returns, same-day spot purchases, and equal-value exchanges at low cost in connection with precious metals such as gold and platinum, etc. In the fixed-monetary-amount purchasing system of this invention, client servers of clients are connected to a main server of a purchasing organization via internet. The clients connect to a fixed-monetary-amount exclusive use site from their client servers, and apply for subscription-registration, balance inquiries, same-day spot purchases, returns, sales, equal-value exchanges and investment, etc., and the purchasing organization executes the specified services while referring to data in a client data base, a financial institution server and a market price file.
